

G.E. Porchet 38.09 Ac.

Scale: 1"=100'

Jean M. Rhodes

Note: This plat has been prepared from an actual field re-survey - with reference made to records, existing field evidence and a survey by Franklin D. Stults.

We find various misleading data as prepared by a previous surveyor - plotted in Nov. 1968.

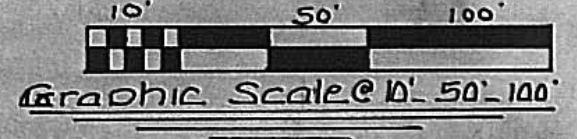

I have made latitude and departure calculations of each area shown and certify their accuracy is within the limits required.

In my opinion this plat is correct and to my knowledge reflects the intent as requested by the client.

Approved by: Rodger Irwin Baker
